

Common GO terms, cluster #1

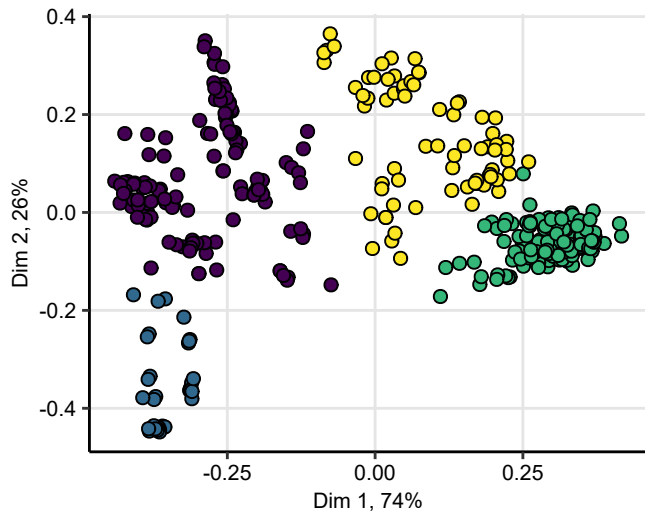

GO terms: n = 133

- RNA processing
- organ development
- reproduction
proliferation
ECM
mesenchymal cell

Common GO terms, cluster #2

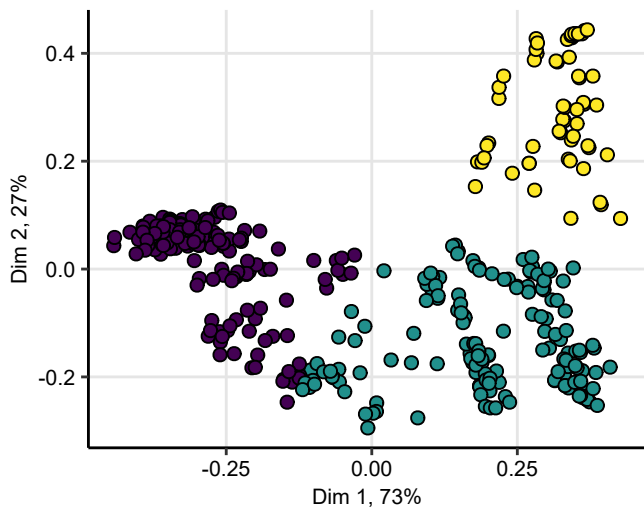

GO terms: n = 369

- collagen, ECM
LDL/HDL
TGFB/BMP/WNT signaling
adhesion, junctions
motility
- transcription
- organ development
angiogenesis
- epithelium
connective tissue
neuronal development

Common GO terms, cluster #3

GO terms: n = 395

- organ development
sex differentiation
mesenchymal cells
hemostasis/coagulation
BMP/SMAD/TGFB signaling
- NOTCH/WNT signaling
FGFR signaling
wound healing
adhesion, junctions, motility
- RNA metabolism
